

# wtf is a static site #highdive

*Sat, May 14, 2022 at 1:25am*

I guess I'm doing this talk for Ian in AA at SEM.js

# the history of websites

- static html uploaded
- served
- http
- tim berners Lee
- serving documents
- sometime we starting servers serving dynamic documents
- we split the document into a shell and content ; ALA php tags

**name: the new dynamic *thanks budparr***

# ssg history

- Jekyll, mixture, ruby
- GitHub rails
- JavaScript node npm
- react gatsby
- spike, dato - API

# talk length

- introduction - who I am, my story

# 11ty presentation as practice

- topic: fetching

# the future

- next, vue, serverless, edge, deno, vite
- PWA, service worker, SSR

# what ssgs do

- setting up express
- templating
- routing: [Page]
- jade/pug liquid, haml, mustache, erb, ejs
- go hugo

## my past

- static IP world of Warcraft Warcraft 3
- film editing, music composition, psych, UI/UX

# semjsTalk - *the new dynamic*

## > #Ian

- #done
  - title *the New Dynamic :: #womRant*
- #tudo
  - bio
- #doing *description / explanation*
  - theNewDynamic.org
    - 2014's only source for static tips n tricks - drastic facelift*
  - *but what was it?*

# wtf is a static site #highdive

*Sat, May 14, 2022 at 1:25am*

- I guess I'm doing this talk for Ian in AA at SEM.js
- the history of websites
  - static html uploaded
  - served
  - http
  - tim berners Lee

# via talk

*some thoughts on Astro*

- Islands architecture
- Slinkity
- vite

# #marx #search

*island guy #website, #blogpost*

# 11ty the #javascript #framework

- % #search #marx  
*markdown slides - mirian suzanne*

## *inbox*

- <https://thenewstack.io/the-state-of-application-modernization-2022/>
- zachleat.com  
*image post about size with squoosh*
- PWA, offline, workbox

# toOrganize

- tND
  - future of websites
    - deno
    - typescript
    - edge / serverless
    - rust => wasm
    - env vars
  - it might be easier to spin a full server  
*in a weird way,*
  - ? so - I'd really rather not learn docker

# tND #research

*Thu, Jun 2, 2022 at 2:49pm*

- kent - shipping to the edge  
*& notes*
  - the server - CDN ( the edge)
  - remix
- swizec serverless

*Thu, Jun 2, 2022 at 7:54pm*

# tND

- numbers on websites
- with react
- marketing
- wom.dev

# rambles

- *Sat, Jun 4, 2022 at 2:19am*

- so i think i need an apps folder
- i think specific functions are packages  
*AKA eleventy, sanity fetch*

# rambles

- *Sun, Jun 5, 2022 at 6:33pm*

- primeagen & ryan carniato
  - server - stateless  
*mvc makes sense*
    - hook model data up to view data
    - managed by
    - singleton controller
  - client - long sessions
    - mvc -> mvvm

# fireship quote lazy dev

*#tnd - Sun, Jun 5, 2022 at 11:25pm*

# disability #tND

**cube Hank Andy Bell #tND**

# cahoots

*#tND - Tue, Jun 7, 2022 at 7:07pm*

- do a dummy run  
*see how long it is*
- ask Ian how long I have
- I gotta think about my slides
- I just need to start the slides
- big mouse
- strapi -> mongo
- I make marketing websites

# 6w1 #inbox

## shelf

- the importance of heirarchy  
*#thought - Thu, Jun 2, 2022 at 8:28pm*
  - #inspiration  
*workflowy, DOM, markdown, routes*
  - #cluster  
*similar paint points*
- #tND #research  
*Thu, Jun 2, 2022 at 2:49pm*

# what is my stack

*some tND #rambles - Thu, Jun 2, 2022 at 7:59pm*

- netlify
- github\*  
*dont even really use with new netlify*
- 11ty
- serverless

# goals for #tND

*some tND #rambles - Thu, Jun 2, 2022 at 7:59pm*

- MPA
- monorepo
- PWA
- auth - so you can fork #marx  
*google, github, netlify*

## notes for #tND

publish pwa & come up with feature set &T

*Fri, Jun 3, 2022 at 3:28am*

**sanity datetime metadata for each new node**

*making tudo is gonna be hard*

# pnpm & monorepo

*flush this out*

# marx revisited

*Thu, Jun 2, 2022 at 10:20pm*

- ! *#fixes order, offset, limit*
- ! *#improvements*
  - *sort ! ? by weeks - in datetime - 60 x 60 x 24 x 7*
  - *fix fetch ? fetch parameters*
    - *< 2 weeks | > 2 weeks cache, fetch*
    - *serverless function! - run this! netlify plugin*
- ? - *the new architecture marx, rebuild w/*

# notes on yolo/utils

- *Fri, Jun 3, 2022 at 2:47am*

- ! dracula  
*website theme*
- views  
*yesterday , last 3 days, past week ->  
fortnight, month*
- component  
*CRUD wrapper around each item*
  - goal : change category  
*inbox to XYZ*

# mv branches, CICD

*yolo > dev > main*

# rambles #dadChair #cy4n

\*- Thu, Jun 9, 2022 at 2:07am \*  
*watching color of money*

# **! zfs benefit**

*raid and scrubbing*

**i need to attempt to go over past WFs**

*maybe make blogposts*

**i dont like the WF WF**

*i feel like a submit form would feel so much better*

**if i got a few more lines, probs 200,**

*i could do a bi-monthly export*

**nodejs script => create new\_file**

# notes

*have been on more of a hardware kick recently*

- zfs
- raid
- scrubbing
- iscsi
- raspi
